WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U.S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

~~TOP SECRET~~

PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IPIc (DIA). The photographic analysis for this particular report was performed by the Production Center IPIc.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1D

A fenced POL yard is just outside Redekhov, near the single-track rail line which connects with Lvov 70 kilometers to the southwest (Figure 1). The yard occupies about 9.5 acres and contains (Figures 2 and 3) 10 vertical tanks, a possible loading/unloading rack, and associated single-track rail spur. Direct road service is via a two-or three-lane crushed rock/gravel road which extends southwest from Redekhov. Other crushed rock/gravel roads converge on the area from four points. No buildings are discernible in the yard. There was no apparent change from [redacted] During [redacted] KEYHOLE missions, activity appeared to be constant.

25X1D

DESCRIPTION OF INSTALLATION

Railroad Service

The installation is served by a spur from the Novovolynsk-Lvov rail line. There are probable loading/unloading racks along the spur.

Road Service

A single or double lane crushed rock/gravel road from the installation connects with a two-or three-lane crushed rock/gravel road to Redekhov.

POL Storage Area

Area G contains 10 tanks; two 45 feet in diameter, three 40 feet in diameter, three 30 feet in diameter, and two 15 feet in diameter. One tank is dark colored and the rest are light toned, probably to reduce liquid expansion.
